

Safety 2.0

Per Stjernqvist

VP Servitization & Solutions, Trackunit

IPAF The Future?

IPAF & Contractor in Sync

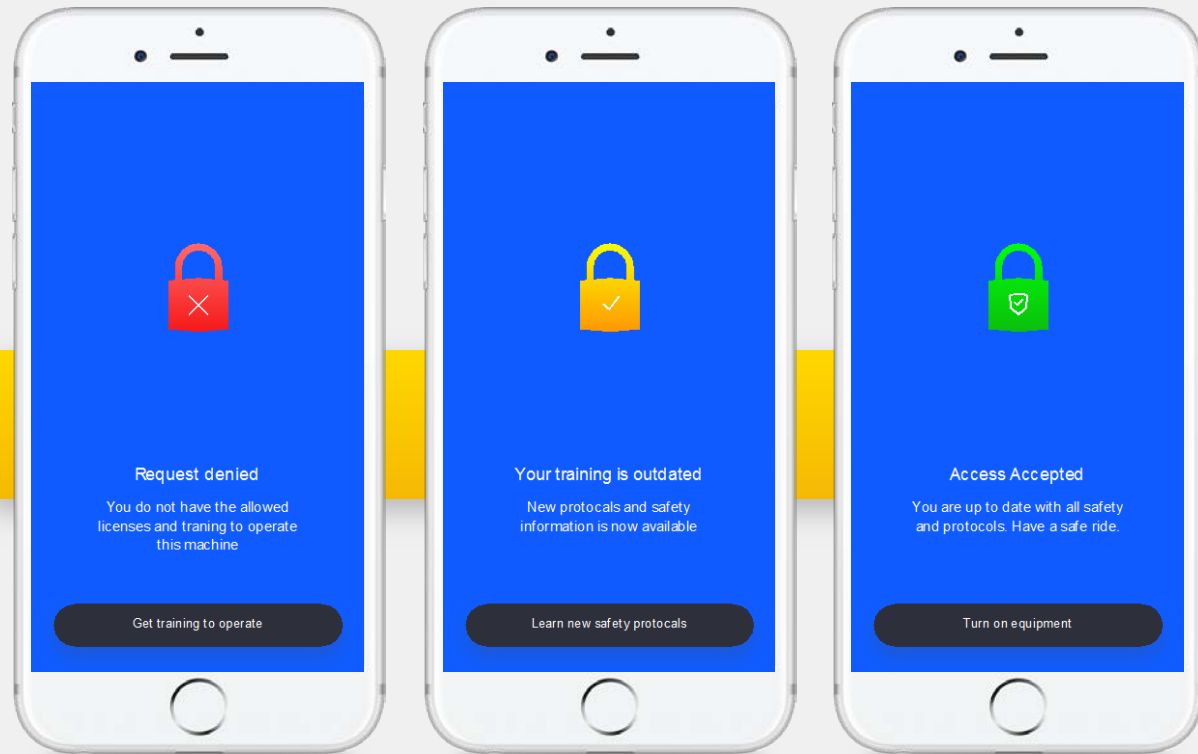

1. Connect to machine via QR code
2. One single login via IPAF
3. Informs all relevant stakeholders of the operators actions

Managing Permissions

Give drivers selective access to contractors equipment, using permissions.

Provide safety initiatives and training programmes to drivers based on their Powered Access Licence status.

To Contractor, IPAF & Renter

Anders Jensen has been denied access to 34/22 IC - Genie Lift. Owned by Loxam

To Contractor, IPAF & Renter

Anders Jensen has updated his safety protocols on the 34/22 IC – Genie Lift

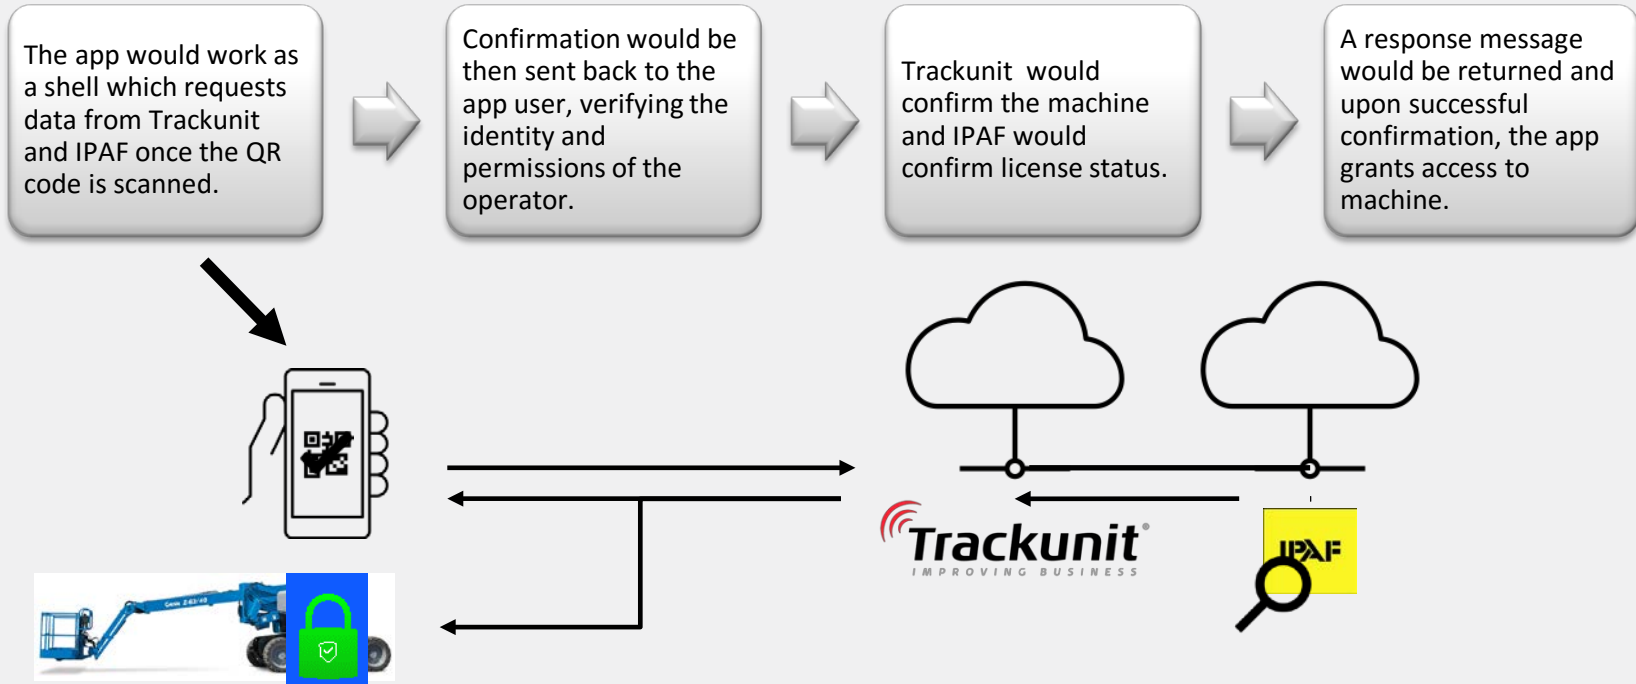

Multiple Access Levels

With multiple access levels, the app lets you know who is driving and the current status of their Pal Card.

Messages are sent to both the Contractor and the Renter, informing them of active drivers who are unlicensed and/or lacking up to date safety training.

Only One Call Away

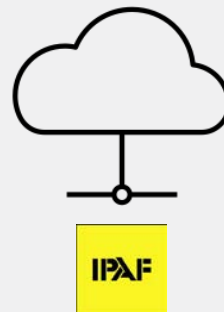

Sharing Data Across Servers

By connecting our servers we would be able to spot unqualified operators, prevent safety breaches and provide untrained operators with news and training courses directly & instantly.

Data:
Machine series and ID
Owner of machine
Contractor agreement

Permission
Access to machine
Ignite machine

Data:
PAL Card owner
Licenses
Training status
Updated training protocols

Permission
Determine level of permission

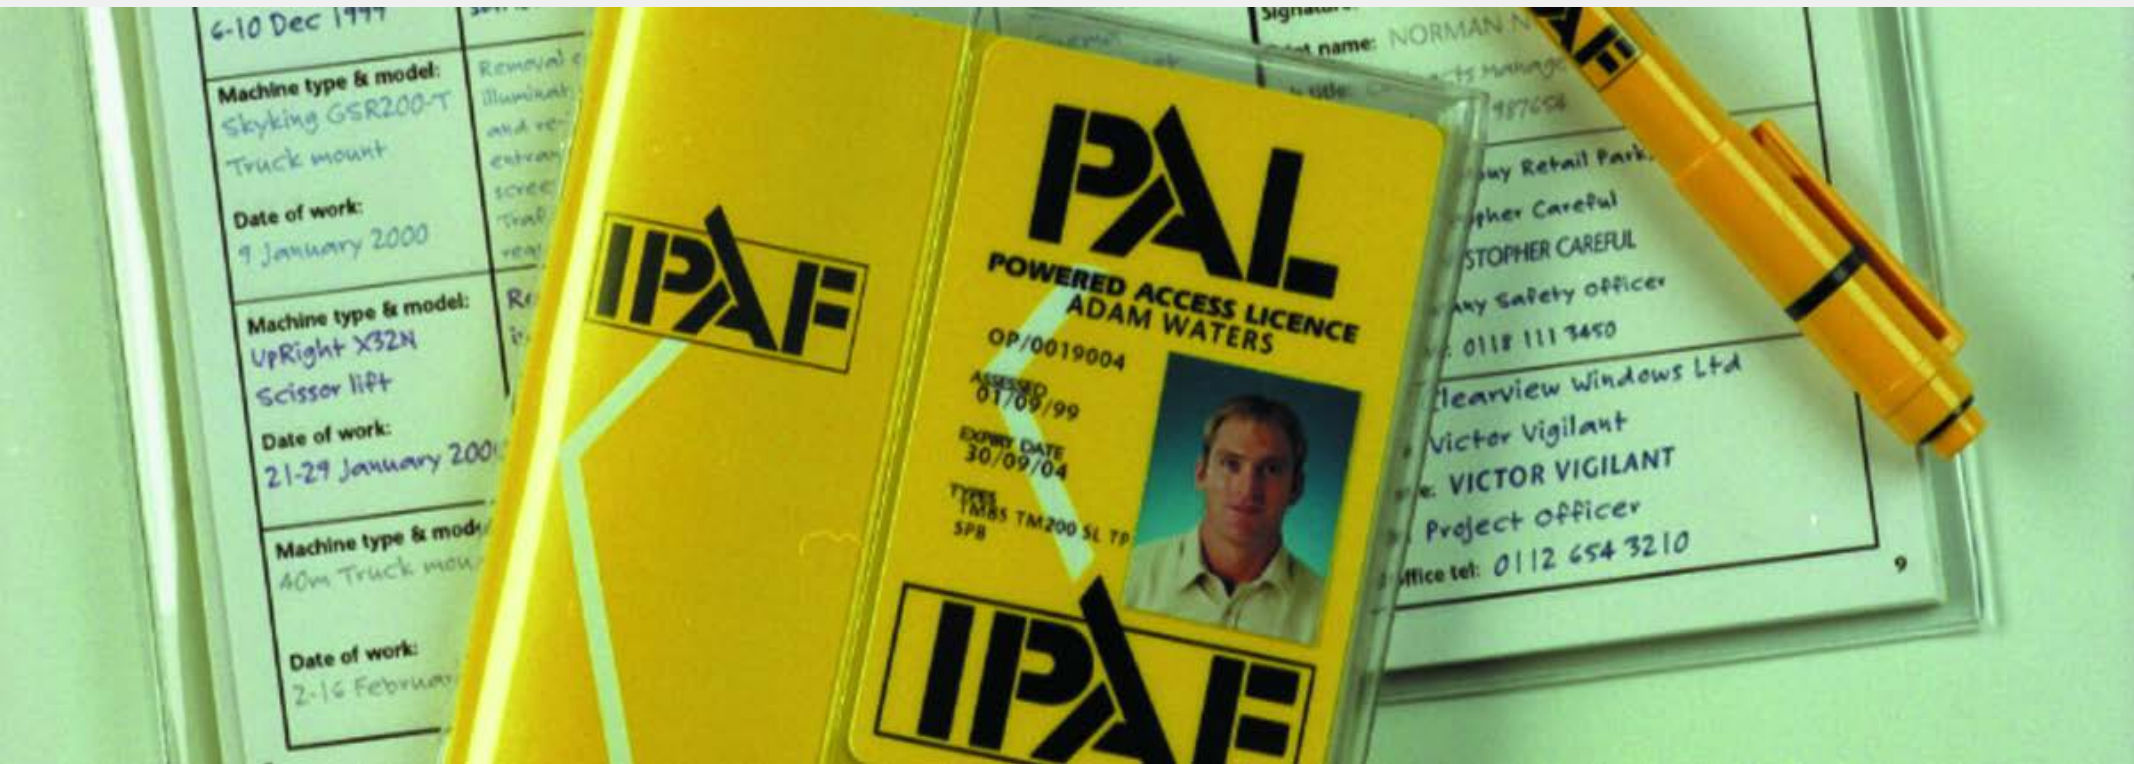

Managing operator instructions and training

Familiarisation and Emergency Lowering videos

1. Connect to machine via QR code
2. One single login via IPAF
3. Informs all relevant stakeholders of the operators actions

ANALOG

DIGITAL

1. Digital log book
2. My diplomas
3. Machines/Lifts I have operated
4. Jobs that I am proud of

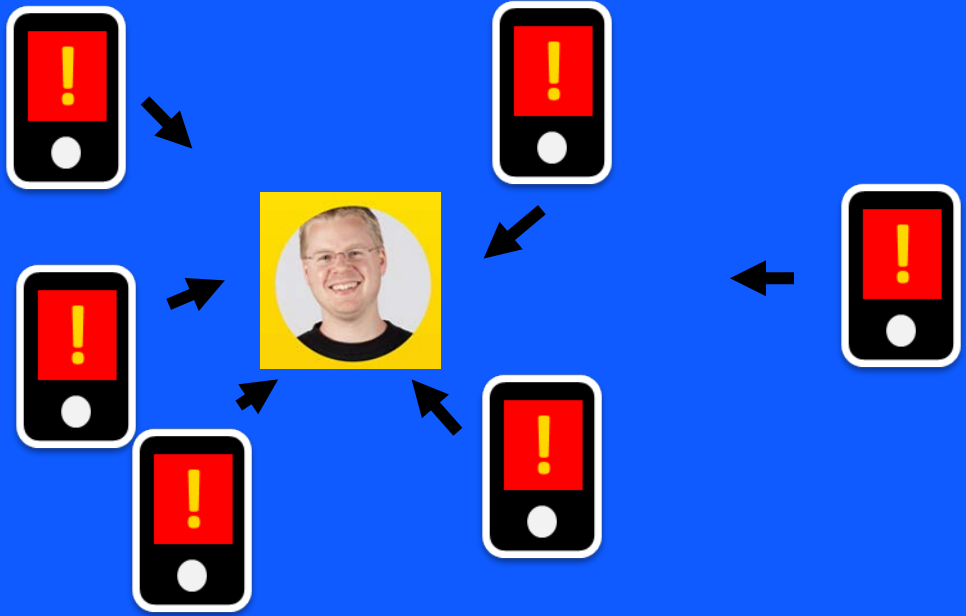

To Contractor, IPAF & Renter

URGENT!
Adam Waters need
help now.

URGENT HELP to the operator

Lets Spread the Message

By incorporating a Facebook signup on the log in page, we would be able to connect PAL Card with the operators social media account.

This would enable the operator to share content from the app to their social network, with like minded operators.

THANK YOU
